sanjeet prasad verma

AI Engineer @TCS | Data engineer | Full stack developer
India

Summary

Motivated and detail-oriented software professional with hands-on experience in web development, ethical hacking, and DevOps. Currently working at TCS, where I'm gaining expertise in Java, Python, Selenium Testing, DevOps, AWS and AI/ML. I've built scalable full-stack web projects. Passionate about building secure and performant applications and continuously exploring emerging technologies.

Experience

Tata Consultancy Services
Developer
December 2024 - Present (1 year)

Building a React.js-based full-stack project, contributing across both frontend and backend. Involved in the data ingestion, writing efficient SQL and Python code to process and manage data. Working on a GenAI (Generative AI) project with a strong focus on Python backend development and data integration. Passionate about building scalable, data-driven applications using modern web technologies and AI.
